

**Project Design Phase-I**  
**Solution Architecture**

Date	04 November 2022
Team ID	PNT2022TMID42609
Project Name	Project – Developing A Flight Delay Prediction Model Using Machine Learning
Maximum Marks	4 Marks

**Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

PROJECT: TITLE: **DEVELOPING A FLIGHT DELAY PREDICTION MODEL USING MACHINE LEARNING**

TEAM ID: **PNT2022TMID42609**

Design-Phase I: SOLUTION ARCHITECTURE
